

### BugBu 310 BOM (315x300x300 build volume)

**Please note:** The items listed don't include any extra wiring or a Pi and as with any BOM, there are going to be small miscellaneous parts needed along the way. The scREW assortments will hopefully cover a lot of the miscellaneous. For a more rigid gantry, 4 - 45mm Linear Bearings are better, but the shorter ones in the BOM will work fine. This list is only a guide, better pricing may be found elsewhere. While every effort has been made to make this a complete list, and the design easy to assemble, please know this is still a self sourced ground up 3D printer build and will require printed parts, time, and attention to details. All work is done so at your own risk and without any liability to the designer of the project.

The STL file parts are pre orientated for best printing. Print with no less than 6 walls and 20% infill. The STL file name will tell you quantity of each item and if it needs supports, only two parts should need supports. I use Polymaker PLA Pro for the parts unless I enclose the printer, I go to Polymaker ASA or ABS.

MOTION:	Quantity	Price Each	Total	Amazon or Ali Link to Suggested Part
GT2 6mm Belt, 5 meter minimum length	1	\$9.00	\$9.00	<a href="https://www.amazon.com/dp/B097T212B9/ref=twister_B09877BH12?encoding=UTF8&amp;psc=1">https://www.amazon.com/dp/B097T212B9/ref=twister_B09877BH12?encoding=UTF8&amp;psc=1</a>
